

2. Data Ingestion

- ✗ collecting data
- ✗ Batch Ingestion
- ✗ real-time ingestion
- ✗ Tools: Apache, kafka

1. Data Sources

- ✗ structured data
- ✗ semi-structured data
- ✗ unstructured data

8. Data Governance & Security

- ✗ Ensuring security
- ✗ privacy & analytics
- ✗ data quality
- ✗ data security
- ✗ data privacy
- ✗ access control.

3. Storage Layer

- ✗ storing Big data
- ✗ distributed storage
- ✗ scalable & fault Tolerant
- ✗ Tools: HDFS, NOSQL

Flow of data

→ ingestion → storage → preprocessing

→ Analytics

Visualization → Decision making

Big Data Eco system
Collection, storage, processing.
analysis & visualization of large volume of data

Data flow
Data Ingestion
Data Storage
Data Processing

7. Data visualization

- ✗ visualizing & presenting Insights
- ✗ Dashboards
- ✗ Reports
- ✗ Tools: Tableau, power BI

4. preprocessing Layer

- ✗ processing & computing Layer data
- ✗ Batch processing
- ✗ real-time preprocessing.

5. Resource management

- ✗ managing cluster resources
- ✗ allocate, monitor, manage
- ✗ Tools: Yarn, MapR.

6. Analytics & Machine Learning

- ✗ Analysing data & building Intelligence
- ✗ statistical Analysis.

XXXX

Supporting Components

cluster management

- ✗ install configure
- ✗ monitor cluster

Workflow

- ✗ automate & schedule jobs

metadata management

- ✗ manage metadata & lineage.
